

Health Issues Groups Ranking

The Alabama Department of Public Health (ADPH) is seeking Public Health Accreditation and asks for your assistance in completing the process with community involvement. We ask that you use your expertise and knowledge of the health status to rank the following Health Issues Groups. This information will be used in the development of a statewide Community Health Needs Assessment. Please respond or contact us by noon on Tuesday, April 8, 2014.

Please rank the following 22 Health Issues Groups in order of importance from 1 to 22, 1 being most important and 22 being least important.

Access to care	Geriatrics
Cancer	Immunizations
Child Abuse/Neglect	Injury Prevention
Circulatory Diseases	Mental Health and Substance Abuse
Cultural Issues	Nutrition and Physical Activity (including obesity)
Dental Health	Poor Pregnancy Outcomes
Diabetes	Pulmonary Diseases
Disability	Sexually Transmitted Infections
Disaster Preparedness	Single Parent Issues
Environmental	Tobacco Use
Food Poisoning	Violence

Do you have any additional health issues that you would like to see included?

ADPH is hosting a webinar on April 30, 2014, at 1:30 p.m., and invites a representative of your organization to participate. The purpose of the webinar is to discuss findings from several groups identifying the prioritized health issues for Alabama and to discuss the Community Health Assessment project. [Click here for the webinar registration link.](#)

Please include the contact information for the individual who would be representing your organization at this and future webinars.
