

Breast and cervical cancer screening: Keeping pace with Advances in prevention and screening

Satellite Conference and Live Webcast

Wednesday, June 26, 2019, 1:00-3:00 p.m. (Central Time)

2:00-4:00 p.m. (Eastern) • 12:00-2:00 p.m. (Mountain) • 11:00 a.m.-1:00 p.m. (Pacific)

Breast cancer is not the same disease in all patients. This program will discuss why patients and their management is individualized. Individualization includes monitoring patients for the development of cancer, determining who needs genetic testing, and how to treat patients that get breast cancer. Cervical cancer screening recommendations continue to change rapidly. Program faculty will also cover the latest in cervical cancer prevention including vaccination, screening, and treatment of preinvasive disease. The program will address how to get patients covered through the Alabama Breast and Cervical Cancer Early Detection Program, and how this can improve the bottom line in your practice.

Program Objectives:

1. Participants will be able to describe what breast cancer statistics suggest in terms of a person's risk for developing breast cancer.
2. Participants will be able to list factors that are needed to complete breast cancer risk assessments.
3. Participants will be able to recognize most commonly used breast cancer risk assessments.
4. Participants will be able to identify that Alabama is #1 in cervical cancer incidence.
5. Participants will understand current cervical cancer prevention guidelines.
6. Participants will understand current best practices for HPV vaccination in the catch-up population.

Conference Details:

Target Audience: Nurses, social workers, clinicians, health educators, and other healthcare professionals and administrators involved in women's health

Continuing Education: Nurses 2 hours and social workers 2 hours

Registration: www.alabamapublichealth.gov/alphnt
